

Electronic Healthcare Evangelist

A great opportunity to help MN healthcare progress into the 21st Century

Facts:

- All healthcare groups are mandated to be e-prescribing by 2011
- All healthcare groups are mandated to be using electronic health records by 2015
- Barack Obama has signed up \$19 BN to help and encourage these groups to meet these targets
- In MN, less than 10% of these groups are currently meeting the criteria – over 15,000 locations

So the opportunity is to educate this largely untapped market on the solutions available and show the financial alternative methods to implement those solutions.

We are a leading MN supplier of a wide range of electronic solutions for Healthcare groups with a particular focus on small to medium offices and locations.

We are looking for nurses or clinic managers that are experienced in the processes used in clinical practices to show clinics how they can easily migrate to the Electronic Age.

We will give full training on the solutions and provide business and technical support.

The positions can be part or full time. No limit on earnings – estimated that a minimum of \$35,000 per year achievable with strong upside, dependant only on applied efforts.

Requirements:

- Must have 3 years clinical experience in Minnesota.
- Must have outgoing personality with good communication skills
- should have good computer skills to enable demonstrations on computer or via Internet
- self motivated

Please respond to Alan Ainsworth at awa@phenet.net with a brief summary of experience and contact details. All inquiries will be kept strictly confidential.
