ALLSCRIPTS SELECTS PHENOMENAL NETWORKS AS SALES PARTNER IN MINNESOTA

FOCUS ON PROVIDING ELECTRONIC MEDICAL MANAGEMENT SYSTEMS FOR SMALL/MEDIUM HEALTHCARE ORGANIZATIONS

EDEN PRAIRIE, Minnesota, January 26, 2009 – Phenomenal Networks, a Cisco Premier partner, has signed an agreement with Allscripts to be the first Reseller in Minnesota to represent their Allscripts MyWay™ Electronic Medical Management products and services. Allscripts MyWay™ provides small to mid-sized healthcare practices with a complete, clinical system solution for billing, scheduling, electronic claims, maintenance & support plus many more medical management features. Users have the option to use the capabilities either in a fully host-based mode or as an on-premise solution – both options available at a single, low monthly cost.

“With Phenomenal’s strong focus on the Minnesota Healthcare market, we are really excited to be chosen by a market leader like Allscripts to represent their products,” said Dave Shepherdson, Phenomenal’s President. “The Allscripts MyWay™ product is particularly appropriate as it allows the small to medium medical operations to easily enter the Electronic Medical Record age and optimize their costs. With President-Elect Obama’s stress on improving the US healthcare system, we are pleased that we will be offering a simple solution to the 80% or so doctors that still need to upgrade from a paper-only system.”

“We have developed the Allscripts MyWay™ solution to address the needs of a wide range of healthcare organizations,” commented Gavin Yoder, Regional Vice President, Channel Sales for Allscripts. “We chose Phenomenal to help us because of their focus and experience in selling

system solutions into the Healthcare market in Minnesota. Their technical expertise combined with their current market presence will enable our companies to provide the necessary tools to hundreds of practices that will need to be compliant with emerging regulations on the use of electronic medical records.”

Allscripts MyWay™ is designed for the unique working environments found in most specialties in physician practices. It is a simple, intuitive, easy-to-use integrated solution covering practice management, EMR, and claims management. Users have a choice between either the hosted service to minimize the cost and effort of using advanced technology, or to pick the on-premise version to leverage current IT infrastructure and in-house capabilities.

The three main functions are:

- **Practice Management**
Schedule patients, allocate resources, pull reports, handle the demographic details that profile contact points, insurance coverage, pharmacies used, and link it all into the billing process.
- **Electronic Medical Records**
Build a patient history, do clinical charting, capture lab results, handle e-prescriptions, eliminate the paper chase. A full-featured EMR capability to enhance your clinical operations.
- **Claims Management**
The practice financial performance is covered with features that span the entire revenue cycle and make transactions, filing claims and receiving payments easier and faster than ever before.
